

THAT WHICH IS CLAIMED IS

1. The combination of a necklace having a toggle with an aperture, and a pair of eyeglasses having lenses and a frame, said eyeglasses having hinged temple bars which are respectively capable of extending through said aperture while the necklace is worn, to carry the eyeglasses with said toggle, said frame and/or temple bars and said toggle comprising materials that are substantially identical in appearance.

2. The combination of claim 1 in which said frame and temple bars comprise material of identical appearance.

3. The combination of claim 2 in which one of said hinged temple bars passes through the aperture of said toggle so that said eyeglasses are hooked in a hanging position with respect to said toggle.

4. The combination of claim 1 in which said toggle is a ring of an apertured diamond shape.

5. The combination of claim 1 in which one of said hinged temple bars passes through the aperture of said toggle so that said eyeglasses are hooked in a hanging position with respect to said toggle.

6. The combination of claim 1 in which said toggle is a ring of an apertured diamond shape.

7. A necklace and eyeglass set which comprises:
a necklace having a toggle defining an aperture;
a pair of eyeglasses having lenses and a frame, said eyeglasses having hinged temple bars;
said temple bars being capable of extending through said aperture while the necklace is worn, to carry the eyeglasses with said toggle;

said frame and/or temple bars and said toggle comprising identical materials that are identical in color.
